

### **Change in Enterprise High School's Trust Land Plan**

With the sudden departure of two teachers, we are left making a few changes and simplifications to our school trust lands plan.

The requested changes are:

- Previously goal #4 was to use Trust Lands money to fund an ACT prep course during the school day. While we will be still offering this course, we will be paying for it out of a different funding source.
- Previously goal #5 was to use Trust Lands money to fund some learning strategies classes and extra lab classes. We will still offer those classes, but pay for them out of a different funding source.
- We propose to combine goals #4 and #5 and propose the verbiage as follows: *Being a rural school, sometimes it is more difficult to provide the same academic opportunities that some of the larger schools have, due to funding and FTEs. We would like to maintain a diverse selection of courses that our students can take that will enable them to be more college and career ready. These funds will cover these courses to help diversify the academic experience at EHS and provide our students with the same opportunities as other schools. It will also allow us to maintain fine arts programs and a more diverse collection of elective courses so students can explore different options, both in terms of breadth and depth.*

Trust Lands Committee

Sharleen,

I am forwarding you the email thread with all the approvals. I hope you get them all.

Thanks.
